Literature Review for Master Thesis

1 Avalanche Modelling

1.1 Numerical investigation of crack propagation regimes in snow fracture experiments (Bobillier et al., 2024)

1.2 Micromechanical modeling of snow snow failure (Bobillier et al., 2020)

1.3 Modeling snow slab avalanches caused by weak-layer failure – Part 2: Coupled mixed-mode criterion for skier-triggered anticracks (Rosendahl & Weißgraeber, 2020)

1.4 Investigating the release and flow of snow avalanches at the slope-scale using a unified model based on the material point method (Gaume et al., 2019)

1.5 Numerical investigation of the mixed-mode failure of snow (Mulak & Gaume, 2019)

1.6 Snow fracture in relation to slab avalanche release: critical state for the onset of crack propagation (Gaume et al., 2017)

1.7 Modeling of crack propagation in weak snowpack layers using the discrete element method (Gaume et al., 2015)

1.8 A physical SNOWPACK model for the Swiss avalanche warning: Part I: numerical model (Bartelt & Lehning, 2002)

1.9 A numerical model to simulate snow-cover stratigraphy for operational avalanche forecasting (Brun et al., 1992)

1.10 A discrete numerical model for granular assemblies (Cundall & Strack, 1979)

2 Crack Propagation

3 Relevant Source Mechanisms

4 Bibliography
